**RE: Environmental Screenings
New Camden Park
1698 Park Street
Camden, NJ
Block 1263 Lots 2, 2.01, 2.02, and 2.03**

Dear Ms. McCann Johns,

Below is a summary of the Environmental Screening Assessment prepared by Paulus Sokolowski and Sartor, LLC (PS&S).

INTRODUCTION

PS&S performed an environmental screening assessment on a twenty-one (21) acre parcel, identified by Camden County Department of Parks, as the property located at 1698 Park Street, Camden, New Jersey 08103, Block 1263 Lots 2, 2.01, 2.02, and 2.03, which is referred to as the "Site". The purpose of this assessment is to provide a review of historical and regulatory documentation to assess past conditions of the Site, identify available environmental regulatory records, and prepare a letter of results.

PS&S reviewed an electronic search of the standard environmental record sources provided by Environmental Data Resources (EDR) of Shelton, Connecticut. These sources included historical aerials photographs, Sanborn Fire Insurance maps, and an environmental radius record search.

According to the current aerial photograph, the Site currently consists of a park, primarily vacant vegetated land with woody shrubs, a large open grassy area with a small sandy patch to the west, an asphalt paved athletic court to the southwest, a floodplain area that runs along the Cooper River, and an access road to the east. The Site is addressed as the Head of Pine Street in the Camden County tax assessment records and is owned by the Camden County Park Commission. The park is bounded by a vegetated vacant lot to west, Cooper River to the North, three Camden City schools to the south, and a forested City-owned lot to the east. An outline of the parcel is shown on the attached

Figure 1. Identified potential environmental concerns are identified on **Figure 2.**

Summary

The Site was not identified in any regulatory database according to the EDR Radius Report.

During a review of the available aerial photographs and Sanborn Fire Insurance Maps, a permanent structure and associated features were identified from at least 1931 to the 1960s associated with the Camden County Parks Commission. By 1962, the Site was razed and utilized as a park. There is potential for the former buildings to have utilized heating oil stored in aboveground or underground storage tanks.

According to the EDR Radius Report (**Appendix A**), the Site was not identified in any regulatory database.

The north and south adjacent properties are identified in the US Brownfield database as the NJ Coservation Fund Site and the Robert Schweiker Site.

A southern adjacent property, located at 1600 Pine Street, was identified on a SHWS database for a release impacting groundwater identified on May 4, 2005, but has been addressed with institutional and engineering controls.

According to the Sanborn Fire Insurance maps (**Appendix B**), the 1926 map does not include coverage of the Site. The 1950 map depicts two rectangular features and circular feature owned by the Camden County Parks Commission. No coverage is available in 1972, except a portion of a small school building is depicted along the southwest corner or border, however was most likely located off-site. No coverage is available in 1982, except a small circular feature is depicted to the southwest and a portion of an access road to the east. By 1994, the map indicates that the Site is identified as a County Park.

According to the aerial photographs (**Appendix C**), from at least 1931 to 1951 the Site appeared to be developed with a complex consisting of a rectangular building, a circular feature, and two rectangular features on the eastern portion. In 1940 two additional disturbed patches of land were present to the west. By 1962 the aerial photograph depicts the Site features and buildings as razed and filled to grade and the previous facility and disturbed patches are no longer visible. By 1965 portions of the Site appear to be disturbed land and divided with vegetation or road ways into four sections. The 1971 aerial photograph depicts the Site to be slightly disturbed with two roadways to the east. From 1988 to 2017, aerial photographs depict an asphalt paved area and a circular area of disturbed land, indicative of a sports field to the west and walking trail to the east. In addition, a small area with features was depicted to the east in 1999, indicative of a parking lot.

Upon review of the NJDEP online Geo-Web GIS Environmental Mapper, PS&S identified the Site as a mapped regional historic fill area. Typically, historic fill is derived from an off-site source which may be contaminated with heavy metals, polycyclic aromatic compounds (PAHs) or other petroleum products.

CONCLUSIONS

The Site is currently identified as the Camden County Park that consists of a park, primarily vacant vegetated land with woody shrubs, a large open grassy area with a small sandy patch to the west, an asphalt paved athletic court to the southwest, a floodplain area that runs along the Cooper River, and an access road to the east.

According to a review of the available records or information provided, the Site has previously been owned and operated by the Camden County Parks Commission from at least 1931 to the present. Operations include a former building complex, likely associated with park or venue use, and associated features from at least 1931 to the 1960s and thereafter utilized as a public park.

The following Potential Environmental Concerns were identified:

1. The former building may have used heating oil stored in tanks.
2. The Site is identified as a historic fill area. Historic fill commonly contains contaminants such as polycyclic aromatic hydrocarbons and heavy metals at concentrations exceeding NJDEP soil remediation standards.

Recommendations:

PS&S recommends performing a ground penetrating radar scan in the vicinity of the former building area to identify subsurface anomalies that may represent underground heating oil tanks. PS&S also recommends collecting soil boring samples in the area identified as historic fill for analysis of historic fill constituents.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System
US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROLS..... Institutional Controls Sites List

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state and tribal leaking storage tanks

INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST..... Underground Storage Tank Listing
INDIAN UST..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal sites subject to CERCLA removals and CERCLA orders

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 04/27/2022 has revealed that there are 4 SEMS sites within approximately 0.5 miles of the target property.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 04/27/2022 has revealed that there are 5 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 02/28/2022 has revealed that there are 2

EXECUTIVE SUMMARY

CORRACTS sites within approximately 1 mile of the target property.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 02/28/2022 has revealed that there are 2 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Lists of Federal RCRA generators

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA-LQG site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 02/28/2022 has revealed that there are 2 RCRA-VSQG sites within approximately 0.25 miles of the target property.

NJ HWS RE-EVAL: The locations were removed from the Known Contaminated Sites list for a variety of reasons. Some of the sites were taken off the list because they were inactive, some were not assigned a case worker and some were no longer contaminated. Inspectors from the DEP are now undertaking a full re-evaluation of each of the locations statewide. That includes visual and environmental tests to see whether contamination still exists.

A review of the NJ HWS RE-EVAL list, as provided by EDR, and dated 09/20/2007 has revealed that there are 2 NJ HWS RE-EVAL sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal landfills and solid waste disposal facilities

NJ SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection & Energy's Solid Waste Facility Directory.

A review of the NJ SWF/LF list, as provided by EDR, and dated 08/16/2021 has revealed that there is 1 NJ SWF/LF site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

State and tribal institutional control / engineering control registries

NJ ENG CONTROLS: Legal Document that restricts the use of contaminated property; holds owner(s) to the regulatory/statutory requirements for cleanup.

A review of the NJ ENG CONTROLS list, as provided by EDR, and dated 03/06/2022 has revealed that there are 4 NJ ENG CONTROLS sites within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Lists of state and tribal brownfield sites

NJ BROWNFIELDS: Brownfields are identified as former or current commercial or industrial use sites that are presently vacant or underutilized, on which there is suspected to have been a discharge of a contamination to the soil or groundwater at concentrations greater than applicable cleanup criteria.

A review of the NJ BROWNFIELDS list, as provided by EDR, and dated 03/26/2020 has revealed that there are 29 NJ BROWNFIELDS sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that

EXECUTIVE SUMMARY

there are 12 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

NJ ISRA: The ISRA process begins with determining if the Act applies to your type of business and transaction. The provisions of ISRA only apply to industrial establishments. What is an industrial establishment? The term "industrial establishment" refers to the type of business operations and transactions that would subject a facility to review under ISRA. An industrial establishment must meet each of the following three criteria: The place of business or real property at which such business is conducted, having a North American Industry Classification System (NAICS) code listed in N.J.A.C. 7:26 B - Appendix C subject to the specified exceptions and limitations. The place of business must have been engaged in operations on or after December 31, 1983; and The place of business must involve the generation, manufacture, refining, transportation, treatment, storage, handling, or disposal of hazardous substances or hazardous wastes.

A review of the NJ ISRA list, as provided by EDR, and dated 06/10/2022 has revealed that there are 10 NJ ISRA sites within approximately 0.5 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EXECUTIVE SUMMARY

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System:

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

US EPA Assessment, Cleanup and Redevelopment Exchange System (ACRES) is a federal online database for Brownfields Grantees to electronically submit data directly to EPA. NJ-NJEMS (New Jersey - New Jersey Environmental Management System). The Department of Environmental Protection (NJDEP) manages large databases of environmental information in this integrated system.
